

LARG CASE OPTOELECTRONIC LEVEL DETECTOR (OLD)

These sensors are used to detect the presence of liquids such as water , alcohol , diesel , types of acids , and industrial oils with different concentrations and ... in vessels to transport liquids .These sensors are working with transferring the modulated infrared light and reflect its reflection from the sensors at the sensor tip . When the sensor tip contact with any liquid , the reflection of the sensor is disturbed and the sensor output will be changed.

مشخصات فنی	
Power supply	220VAC or 110VAC or 24VAC/DC
Power consumption	1W
Output relay	250V 5A
Humidity rating	25 ~ 99 %
Temperature rating	-20 ~ +60 °C
Max. head pressure	10 Bar
Influence class	IP 66
Power supply indicator	GREEN LED
Output indicator	RED LED
Case size	14-9.5 cm
Connection size	G 1"
Connection material	304 STAINLESS STEEL
Case material	Aluminum

OPTOELECTRONIC LIQUID DETECTOR

V SUPPLY :
220AC : 220VAC
110AC : 110VAC
24ACDC : 24VAC or DC

SENSOR HEAD MATERIAL :
B : Ni-Cr PLATED BRASS
S : STAINLESS STEEL 304L
